

DC-360 P

The DC-360 P makes a full body composition analysis within 20 seconds, thanks to the advanced dual frequency BIA technology.

The results are immediately displayed on the LCD screen and the **integrated printer also automatically prints them out.** This includes **top-line analysis of body fat, muscle mass, BMR and physical score.**

The DC-360 P can be used with the TANITA PRO Software which offers trend analysis, health risk assessment and full client data management.

The integrated printer allows results to be printed and shared with clients straightaway.

The DC-360 P comes with a pole, which allows clients to stand securely on the BIA monitor. Together, you then read the results on the easy-to-read LCD display.

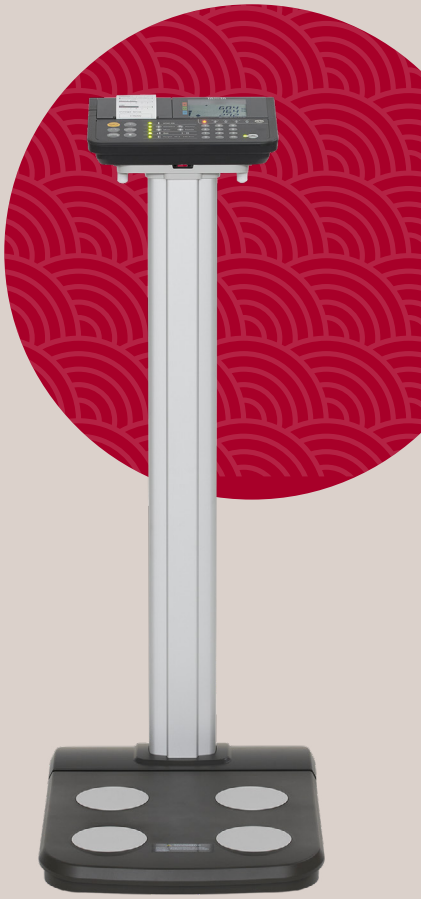

Suitable for:

- Gyms
- Physiotherapy practices
- Health centres

Key Features

- **Full body composition analysis** provided in 20 seconds, thanks to the advanced Dual Frequency BIA Technology
