Smallest Scale

Key Features:

- **Smallest person scale in the world:** Designed with those who travel in mind, the TANITA HD-386 only measures weight. Only weighing 500 grams and comes with a convenient protective travel pouch.
- **High Weighing Capacity of up to 150 kg:** Despite its small size, the scale can measure up to 150 kilograms with a precision of 100 grams, ensuring accurate and reliable readings for various users.
- **Simple Operation:** The scale features tap-on activation for quick use, along with a hold display function that keeps the measurement visible for longer, allowing users ample time to read the results.

*Product comes with a sleeve.
