MC-580 P

Segmental Dual-Frequency Body Composition Analyser for On-the-Go Consultations

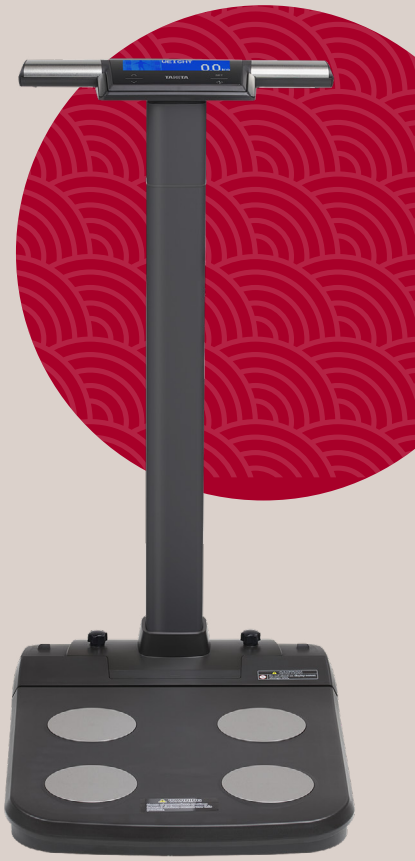

This portable body composition monitor is ideal for on site and on the go consultations.

The MC-580 P runs on a **9V adapter or AA batteries,** allowing you to take it anywhere. This makes it a perfect monitor for **personal trainers** who visit **different locations.** The monitor consists of a single unit and is **easy to take** with you using the matching case for transport. In addition to the MC-580 S the MC-580 P has an **additional column** should you wish to use the product in one location for a longer period of time.

The MC-580 P provides a quick analysis of a client's health and fitness.

The LCD display shows data on fat and muscle mass, both in percentage and absolute mass. With the segmental analysis, you also obtain this data per body segment (both arms, both legs and torso).

It has integrated Bluetooth for easy data transfer and is compatible with the TANITA PRO app (for iOS tablet) via Bluetooth. The TANITA PRO software (for Windows PC) is only compatible via cable connection. So you can easily store, analyze and share the body composition results with your clients.

Key Features

- **Full and fast segmental body composition measurements** using the latest multi frequency BIA technology
- **Lightweight and portable**, suitable for mobile assessments
- **Robust look and feel**, **and high weight capacity:** 270kg with 100g accuracy
- **Extra large LCD dual display** shows analysis in an easy-to-read format
- **Automatic data transfer** through wireless Bluetooth connection to iPad and Android tablet.
- **Optional thermal printer**
- **Accessory available:** C-360 Carry case
